

Screenshots

VPC deployment

The screenshot shows the AWS VPC console interface. The breadcrumb navigation at the top reads 'VPC > Your VPCs > vpc-09fafdcf3c855935d'. The left sidebar contains the 'VPC dashboard' and a 'Virtual private cloud' section with links to 'Your VPCs', 'Subnets', 'Route tables', 'Internet gateways', 'Egress-only internet gateways', 'Carrier gateways', 'DHCP option sets', 'Elastic IPs', 'Managed prefix lists', 'NAT gateways', and 'Peering connections'. The main content area is titled 'vpc-09fafdcf3c855935d / Prod-vpc' and includes an 'Actions' button. Below the title is a 'Details' section with a grid of key-value pairs: VPC ID (vpc-09fafdcf3c855935d), State (Available), Block Public Access (Off), DNS hostnames (Disabled), DNS resolution (Enabled), Tenancy (default), DHCP option set (dopt-05c6648f088edfc58), Main network ACL (acl-06ad73e33cf8cd7cd / Prod-nacl), Default VPC (No), IPv4 CIDR (10.0.0.0/16), Network Address Usage metrics (Disabled), Route 53 Resolver DNS Firewall rule groups (None), IPv6 CIDR (Network border group), Encryption control ID (None), and Owner ID (917086196610). Below the details is a 'Resource map' section with tabs for 'Resource map', 'CIDRs', 'Flow logs', 'Tags', 'Related resources', and 'Integrations'. The 'Resource map' tab is active, showing a visual representation of the VPC resources.

Web subnet

The screenshot shows the AWS VPC console interface for a subnet. The breadcrumb navigation at the top reads 'VPC > Subnets > subnet-08935856f06020cfc'. The left sidebar is identical to the VPC dashboard screenshot. The main content area is titled 'subnet-08935856f06020cfc' and includes an 'Actions' button. Below the title is a 'Details' section with a grid of key-value pairs: Subnet ID (subnet-08935856f06020cfc), Subnet ARN (arn:aws:ec2:us-east-1:917086196610:subnet/subnet-08935856f06020cfc), State (Available), Block Public Access (Off), IPv4 CIDR (10.0.1.0/24), Availability Zone (us-east-1a), Available IPv4 addresses (251), Network ACL (acl-06ad73e33cf8cd7cd / Prod-nacl), Network border group (us-east-1), Auto-assign customer-owned IPv4 address (No), Default subnet (No), IPv6 CIDR reservations (None), Customer-owned IPv4 pool (None), Auto-assign public IPv4 address (No), Outpost ID (None), Resource name DNS AAAA record (Disabled), IPv6 CIDR association ID (None), Route table (rtb-0672fbbb0f3c47a9c / Prod-rt), Auto-assign IPv6 address (No), IPv4 CIDR reservations (None), Resource name DNS A record (Disabled), Hostname type (IP name), and Owner ID (917086196610). Below the details is a 'Resource map' section with tabs for 'Resource map', 'CIDRs', 'Flow logs', 'Tags', 'Related resources', and 'Integrations'. The 'Resource map' tab is active, showing a visual representation of the subnet resources.

App subnet

The screenshot displays the AWS Management Console interface for a subnet. The breadcrumb navigation shows 'VPC' > 'Subnets' > 'subnet-07018bbafd7699c83'. The left-hand navigation pane is expanded to 'Virtual private cloud', with 'Subnets' selected. The main content area is titled 'subnet-07018bbafd7699c83 / App-subnet' and contains a 'Details' section with the following information:

Property	Value
Subnet ID	subnet-07018bbafd7699c83
Subnet ARN	arn:aws:ec2:us-east-1:917086196610:subnet/subnet-07018bbafd7699c83
State	Available
Block Public Access	Off
IPv4 CIDR	10.0.2.0/24
Availability Zone	use1-az2 (us-east-1b)
Network ACL	acl-06ad73e33cf8cd7cd Prod-nacl
Auto-assign customer-owned IPv4 address	No
IPv6 CIDR reservations	-
Resource name DNS AAAA record	Disabled
Available IPv4 addresses	251
Network border group	us-east-1
Default subnet	No
Customer-owned IPv4 pool	-
IPv6-only	No
DNS64	Disabled
IPv6 CIDR	-
VPC	vpc-09fafdcf3c855935d Prod-vpc
Auto-assign public IPv4 address	No
Outpost ID	-
Hostname type	IP name
Owner	917086196610
Route table	rtb-0672fbbb0f3c47a9c Prod-rt
Auto-assign IPv6 address	No
IPv4 CIDR reservations	-
Resource name DNS A record	Disabled

Internet gateway

The screenshot displays the AWS Management Console interface for an internet gateway. The breadcrumb navigation shows 'VPC' > 'Internet gateways' > 'igw-00748ec8f0810a5d9'. The left-hand navigation pane is expanded to 'Virtual private cloud', with 'Internet gateways' selected. The main content area is titled 'igw-00748ec8f0810a5d9 / Prod-igw' and contains a 'Details' section with the following information:

Property	Value
Internet gateway ID	igw-00748ec8f0810a5d9
State	Attached
VPC ID	vpc-09fafdcf3c855935d Prod-vpc
Owner	917086196610

Below the details, there is a 'Tags (1)' section with a search bar and a table showing the tag:

Key	Value
Name	Prod-igw

Route Table

The screenshot shows the AWS Management Console interface for a Route Table. The breadcrumb navigation is VPC > Route tables > rtb-0672fbbb0f3c47a9c. The left sidebar shows the VPC dashboard with a filter by VPC dropdown and a list of VPC resources including Virtual private cloud, Subnets, Route tables, Internet gateways, Egress-only internet gateways, Carrier gateways, DHCP option sets, Elastic IPs, Managed prefix lists, NAT gateways, and Peering connections. The main content area displays the details for the Route Table ID rtb-0672fbbb0f3c47a9c, which is associated with the VPC vpc-09fafdcf3c855935d (Prod-vpc). The details section includes the Route table ID, Main status (Yes), Owner ID (917086196610), Explicit subnet associations (subnet-08935856f06020cfc / Web-subnet), and Edge associations. Below the details are tabs for Routes, Subnet associations, Edge associations, Route propagation, Tags, and Related resources. The Routes tab is active, showing a table with 2 routes. The table has columns for Destination, Target, Status, Propagated, and Route Origin. The first route has Destination 0.0.0.0/0, Target igw-00748ec8f0810a5d9, Status Active, and Route Origin Create Route. The second route has Destination 10.0.0.0/16, Target local, Status Active, and Route Origin Create Route Table. The bottom of the console shows the footer with CloudShell, Agent Toolkit for AWS, Feedback, Console Mobile App, and copyright information for Amazon Web Services, Inc. or its affiliates.

Security Group

The screenshot shows the AWS Management Console interface for a Security Group. The breadcrumb navigation is VPC > Security Groups > sg-00677493574d29baf. The left sidebar shows the VPC dashboard with a filter by VPC dropdown and a list of VPC resources including Virtual private cloud, Subnets, Route tables, Internet gateways, Egress-only internet gateways, Carrier gateways, DHCP option sets, Elastic IPs, Managed prefix lists, NAT gateways, Peering connections, Route servers, Security, Network ACLs, Security groups, PrivateLink and Lattice, Getting started, Endpoints, Endpoint services, and Service networks. The main content area displays the details for the Security Group ID sg-00677493574d29baf, which is associated with the VPC vpc-09fafdcf3c855935d (Prod-vpc). The details section includes the Security group name (default), Security group ID (sg-00677493574d29baf), Description (default VPC security group), VPC ID (vpc-09fafdcf3c855935d), Owner (917086196610), Inbound rules count (2 Permission entries), and Outbound rules count (1 Permission entry). Below the details are tabs for Inbound rules, Outbound rules, Sharing, VPC associations, Related resources - new, and Tags. The Inbound rules tab is active, showing a table with 2 inbound rules. The table has columns for Name, Security group rule ID, IP version, Type, Protocol, and Port. The first rule has Name -, Security group rule ID sgr-0d0b8271fe17d2f62, IP version IPv4, Type HTTP, Protocol TCP, and Port 80. The second rule has Name -, Security group rule ID sgr-01b4e7bd255a4f817, IP version IPv4, Type SSH, Protocol TCP, and Port 22. The bottom of the console shows the footer with CloudShell, Agent Toolkit for AWS, Feedback, Console Mobile App, and copyright information for Amazon Web Services, Inc. or its affiliates.

NACL

The screenshot displays the AWS Management Console interface for a Network ACL. The breadcrumb navigation shows 'VPC' > 'Network ACLs' > 'acl-06ad73e33cf8cd7cd / Prod-nacl'. The left sidebar lists various VPC resources, with 'Network ACLs' highlighted under the 'Security' section. The main content area shows the details for the Network ACL 'acl-06ad73e33cf8cd7cd / Prod-nacl'. The 'Details' tab is active, showing the Network ACL ID, Owner, Associated with (2 Subnets), Default (Yes), and VPC ID (vpc-09fafdcf3c855935d / Prod-vpc). Below the details, the 'Inbound rules' tab is selected, showing a table of inbound rules. The table has columns for Rule number, Type, Protocol, Port range, Source, and Allow/Deny. There are two rules: Rule 100 (Allow) and Rule * (Deny).

Auto scaling

The screenshot shows the AWS Management Console interface for an Auto Scaling group named 'Prod auto scaling'. The left sidebar contains navigation links for EC2, Auto Scaling groups, and various EC2-related services. The main content area displays the 'Prod auto scaling Capacity overview' with a table showing 'Desired capacity' (1), 'Scaling limits' (1 - 1), 'Desired capacity type' (Units (number of instances)), and 'Status' (At desired capacity). Below this, the 'Date created' is listed as 'Wed Aug 05 2026 17:09:12 GMT+0530 (India Standard Time)'. The 'Launch template' section shows the 'Launch template' (lt-06806982d3bed934d), 'AMI ID' (ami-0bdc7d025135d7b49), 'Instance type' (t3.micro), and 'Owner' (arn:aws:iam::917086196610:root). The bottom of the console shows the footer with '© 2026, Amazon Web Services, Inc. or its affiliates.' and links for 'Privacy', 'Terms', and 'Cookie preferences'.

EFS file system

The screenshot shows the AWS Management Console interface for an Elastic File System (EFS) named 'Prod-file (fs-049b9b3a95f133243)'. The left sidebar contains navigation links for Elastic File System, File systems, and Access points. The main content area displays the 'General' tab with a table showing 'Amazon resource name (ARN)' (arn:aws:elasticfilesystem:us-east-1:917086196610:file-system/fs-049b9b3a95f133243), 'Performance mode' (General Purpose), 'Throughput mode' (Elastic), 'Lifecycle management' (Transition into Infrequent Access (IA): 30 day(s) since last access, Transition into Archive: 90 day(s) since last access, Transition into Standard: None), 'Availability zone' (Regional), 'Automatic backups' (Enabled), 'Encrypted' (367cb396-4c81-440e-a195-899e68be9c87 (aws/elasticfilesystem)), 'File system state' (Available), 'DNS name' (fs-049b9b3a95f133243.efs.us-east-1.amazonaws.com), and 'Replication overwrite protection' (Enabled). The bottom of the console shows the footer with '© 2026, Amazon Web Services, Inc. or its affiliates.' and links for 'Privacy', 'Terms', and 'Cookie preferences'.

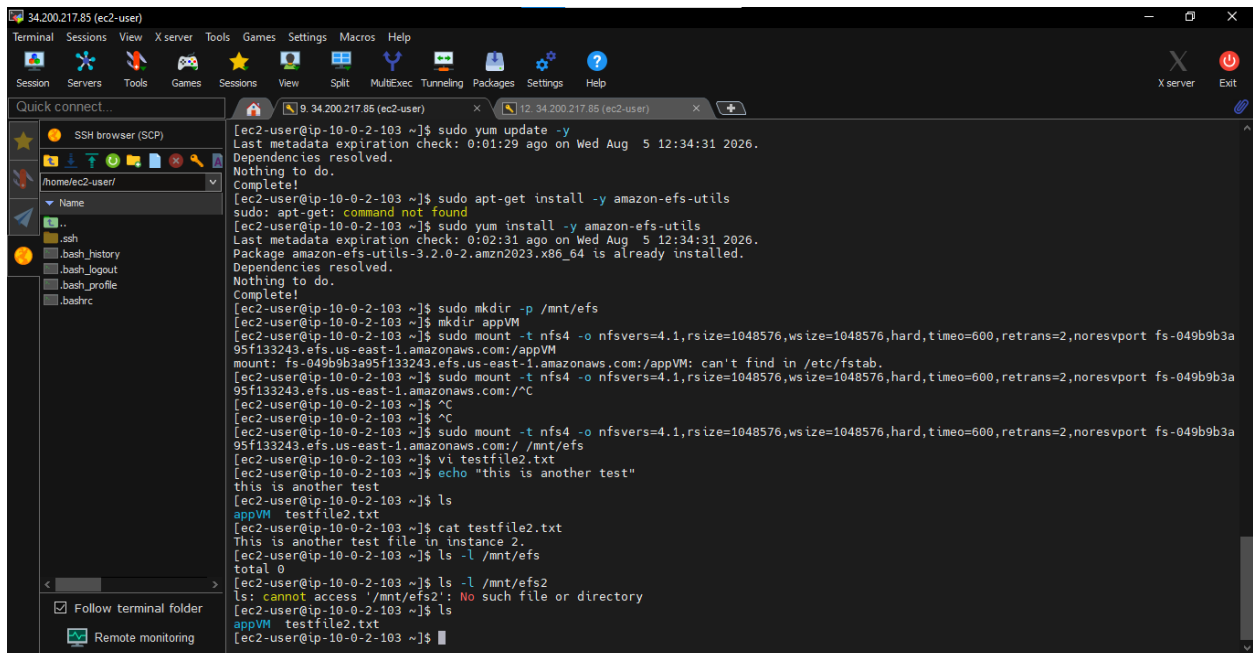

EFS public server deployment

The screenshot shows a terminal window with two tabs. The active tab is titled '9. 34.200.217.85 (ec2-user)'. The terminal output shows the following commands and their results:

```
Complete!  
[root@ip-10-0-1-170 ~]# sudo mkdir -p /mnt/efs

CloudFront deployment

The screenshot shows the AWS CloudFront console for a distribution named 'Prod-cloud' (Standard). The left sidebar contains navigation links for CloudFront, Distributions, Policies, Functions, Static IPs, VPC origins, SaaS, Telemetry, and Reports & analytics. The main content area displays the distribution details and settings.

Details

Property	Value
Distribution domain name	d2okezsrezri68.cloudfront.net
Billing	C
ARN	arn:aws:cloudfront::917086196610:distribution/E8RU5ZH3RVLDO
Last modified	August 5, 2026 at 2:30:14 PM UTC

Settings

Property	Value
Name	Prod-cloud
Description	Prod-cloud
Price class	Use all edge locations (best performance)
Alternate domain names	-
Standard logging	Off
Cookie logging	Off
Default root object	-

CDN website url

The screenshot shows the AWS EC2 console for an instance named 'i-0a0108f61278437f5' (AppVM). The left sidebar contains navigation links for EC2, Dashboard, AWS Global View, Events, Instances, Instance Types, Launch Templates, Spot Requests, Savings Plans, Reserved Instances, Dedicated Hosts, Capacity Reservations, Capacity Manager, Images, AMIs, AMI Catalog, Elastic Block Store, Volumes, and Snapshots. The main content area displays the instance summary.
